

## TESTING USING JUNIT

In order to test my classes and methods I used Junit. Please refer to the testing scripts with the following names: StaffTest.java, AdminTest.java and CustomerTest.java.

Testing methods under Staff class: carToString, addCars, addCar, printCars, sellCar and the overloaded method calculateRevenue.

Testing methods under Customer class and User class: readCars, the overloaded method searchCars and encodePassword.

Testing methods under Admin class: addUser and addUser
